

Endpoint Data Loss Prevention

Discover, Monitor, Prevent Sensitive Data Leakage on Your Endpoints

Somansa Data Loss Prevention (DLP) security solution is designed to help organizations in financial services, healthcare, retail, government and other industries protect sensitive company data including intellectual property and confidential information, wherever it may be (cloud, on-premise, endpoints) from leakage, while reducing the costs and complexity of managing a DLP solution.

Somansa Privacy-i is an endpoint data loss prevention (DLP) solution to protect sensitive data and personal information stored in company desktops, laptops, and devices from leakage using discovery and prevent features based on content, context aware policy rules to block copy and transfer to USB, Media, Printing, Wi-Fi/Bluetooth, and applications.

FEATURES

Discover
