

Network Data Loss Prevention

Prevent Sensitive Data Leakage in Motion

Somansa Data Loss Prevention (DLP) security solution is designed to help organizations in financial services, healthcare, retail, government and other industries protect sensitive company data including intellectual property and confidential information, wherever it may be (cloud, on-premise, endpoints) from leakage, while reducing the costs and complexity of managing a DLP solution.

Somansa Mail-i is a network data loss prevention (DLP) solution to protect sensitive data and personal information in motion using its superior packet and protocol analysis technology by monitoring outbound network traffic including Email, Messenger, FTP, HTTP/HTTPS, and Cloud Services.

FEATURES

Monitor

Monitors and analyzes outbound network traffic.

- Visibility: Manage data traffic across multiple ports, network protocols, and channels.

Data Loss Prevention, DLP

Blocks sensitive data in motion based on policy rules.

- Email, Messenger, FTP, HTTP/HTTPS, and Cloud Services including Office365, Google Apps, AWS and iCloud.

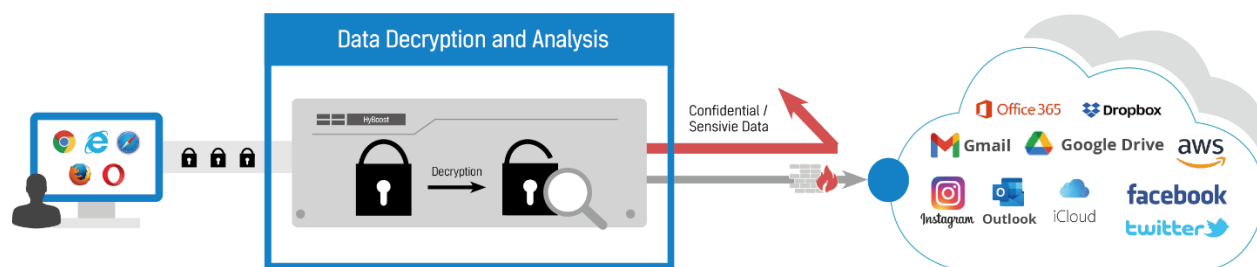

Management

A Web-based Central Management Console allows administrators to view real-time Reports & Incidents, Create Policy Rules, manage Agent Users.

“After evaluating several other solutions, Center Bank selected Somansa’s Mail-i to identify and protect confidential and customer information.”

– Jae Choi, IT Director, Center Bank

BENEFITS

Content and Context Aware Policies • Regular Expressions, Patterns (credit card numbers, social security numbers), Keywords • Structured and Unstructured Data (MS Office, PDF, Source Codes) • Users/Groups, Devices, File Types, Location • Regulatory Compliance Policies, GDPR, PCI-DSS, CCPA, HIPAA, Local Data Privacy, and more.
