

#1 Cost-Effective **Database/Application Backup** for Businesses and MSPs

Backup from Any Location

VMs, Servers, Endpoints, Cloud VMs, SaaS, DBs/Applications, NAS/File Share

Store Backup Anywhere

On-Premise/Remote Storage, Your Own Public Cloud, BDRShield Cloud

Centralized Management

BDRShield Cloud-Hosted (or) Self Hosted Management Console

BDRShield for Database/Application Backup & Recovery

BDRShield provides backup and recovery solutions for databases and applications, ensuring data integrity and availability. BDRShield supports database-level backup for SQL Server, MySQL, PostgreSQL, as well as application-level backup for Exchange and SharePoint. BDRShield addresses challenges such as data loss, minimizing downtime and ensuring data integrity, making it ideal for MSPs and businesses.

Direct-to-Cloud Backups

BDRShield Cloud

Utilize our reliable & secure BDRShield Cloud Storage

Bring Your Own Cloud

Use your existing Private/Public Cloud Storage

Amazon S3 | Azure Blob | Google Cloud | Wasabi
Backblaze | MinIO | Other S3 Compatible Storage

Key Features

Database/Application level Backup

Securely backup only the critical databases and applications, ensuring data integrity and facilitating quick recovery to minimize downtime.

Image-level Backup

Perform disk-image backup of the machine in which the application/database is running for complete system recovery in the event of a failure.

SQL Server Backup & Recovery

Backup and quickly restore your SQL Server databases, ensuring that all tables, procedures, and configurations are available and easily recoverable to prevent data loss and downtime.

MySQL Backup & Recovery

Efficiently backup and recover MySQL databases, safeguarding all schemas, tables, and stored procedures, providing reliable data protection and minimizing application downtime.

PostgreSQL Backup & Recovery

Securely backup and restore PostgreSQL databases, ensuring the safety and integrity of all database objects, including tables, indexes, and functions, with quick recovery options.

Microsoft Exchange Server Backup & Recovery

Comprehensive backup for Microsoft Exchange Server, ensuring the protection of critical email data. This allows for quick restoration of mailboxes, emails, tasks, and other data.

SharePoint Server Backup & Recovery

Backup your SharePoint Server data, enabling quick restoration of sites, documents, lists, libraries, and configurations to maintain seamless collaboration and productivity.

Flexible Backup Storage

Supports backup storage across multiple tiers, including onsite/remote storage, BDRShield Cloud, Private/Public cloud, providing flexible options for data protection.

Incremental Backup

Captures only the changes made since the previous backup, which significantly reduces backup time and storage usage.

Granular Restore

Enables the recovery of specific items such as individual database tables, emails, or files, facilitating precise and efficient restoration without needing a full restore.

Version and Time-Based Retention

Manages multiple versions of backup data and implements time-based retention policies to meet regulatory requirements and storage management.

Data Encryption

BDRShield uses dual-layer encryption approach which provides robust security, protecting data as it moves across networks and when stored on backup media.

Highly Rated

Backup Solution by Customers, MSPs, Channel Partners

“

We use BDRSuite for backup purposes and provide backup as a service to our customers. My company has been able to create a good income with a relatively small investment in BDRSuite. The flexible hybrid solution that BDRSuite provides along with reasonable pricing made us decide for this product instead of its competitors.

What Makes BDRShield

Stand Out from Other Backup Solutions

- Cost-Effectiveness – Significant savings compared to competitors
- 24/7 Responsive Technical Support
- Ease of Use and Management with minimal learning curve
- Quick Setup and deployment
- No edition complexities. One edition for all backup needs

Backup Simplified with

Zero Hardware Investment

- BDRShield Cloud-hosted Centralized Management Console
- Fully Managed in BDRShield Cloud
- No Hardware Investment Required
- Cut Local Infrastructure Costs
- Quick and Simple Setup
- Automatic Upgrades & Maintenance
- Accessible From Anywhere, Anytime
- Scalable for Any Client Size
- Store backup on BDRShield Cloud Storage or on your own Private/Public Cloud or On-premise storage (NAS, SAN)

Centralized Management

Self-hosted management console for overseeing and controlling backup operations across all databases and applications.

Reports & Notifications

BDRShield generates comprehensive reports detailing backup and recovery statuses with email alerts, providing valuable insights into the health of your backup environment.
